SPECTER OPS

Creators of BloodHound

Our Specialty Is
Demystifying Adversary Tradecraft

We are experts in understanding how adversaries do what they do. Breaking down tradecraft into its fundamental building blocks allows SpecterOps to evaluate and equip your organization to handle threat actors who go after your most sensitive data. Whether you are looking to benchmark your security posture today or for a long-term partner to develop your program, SpecterOps has the resources and the knowledge to get you to where you want to be.

Attack Path Assessment
Proactively uncover Active Directory and Entra ID attack paths, analyze choke points, and understand specific and detailed remediation plans with the power of BloodHound Enterprise.

Maturity Assessment
Evaluate security operations program capabilities to meet strategic objectives, not just survive based on the competence of a few key individuals.

Penetration Test
Penetration Testing identifies critical system issues and attack paths.

Purple Team Assessment
Understand how your detection and response capabilities perform against the attacks being used today.

Red Team Exercise
Red Team Exercises simulate an adversary executing an attack path while exercising your detection and response capability.

Program Development
Whether you are building a new team or revamping an existing one, we provide an effective approach focused on ensuring robust prevention, detection, validation, and response capabilities across both defensive and offensive security operations.

About SpecterOps

We specialize in empowering organizations with comprehensive security solutions tailored to combat evolving cyber threats. With a wealth of experience across diverse sectors including government, defense, finance, and healthcare, we excel in understanding adversaries' strategies within enterprise environments.

Our service offerings are designed to fortify security postures by analyzing and enhancing detection capabilities, validating defensive measures through attack simulation, and providing expert guidance to bridge capability gaps.

From program development to technology implementation and partner collaborations, SpecterOps ensures clients are equipped with robust defenses against sophisticated cyber threats, enabling them to confidently safeguard their critical assets.
