

Program Development

Strengthen Your Prevention, Detection, and Response Capabilities

From forming new adversary detection and simulation teams to advancing existing competencies, our approach emphasizes the holistic integration of technical elements into your security operations program.

Why SpecterOps

Whether you are building new offensive or defensive teams, maturing existing competencies, or expanding capabilities, we provide an effective approach focused on comprehensively integrating technical components into the overall security operations program, ensuring robust prevention, detection, validation and response capabilities.

Leveraging lessons learned building and supporting hundreds of teams, we tailor our approach to your desired outcomes. Save time by shortcutting your approach to building transparent, effective, and repeatable capabilities that measurably improve organizational security.

Our Program Development service is designed to provide expert guidance and strategic, operational, and tactical level advice to organizations looking to enhance their security program’s capabilities or overcome specific obstacles. Our team of experts will work with you to gain a comprehensive understanding of how we can best help you progress your goals.

Why Now

Whether building a new team or revamping an existing one, our Program Development and Advisory Services will **accelerate your capability by integrating the best industry expertise and knowledge right into your program.**

You'll receive a structured approach and expert guidance to enhance your offensive and defensive security programs.

SpecterOps tests and validates hundreds of clients and their capabilities to detect and respond to our most advanced tradecraft. Across all of these organizations, there are a several key common themes that we have observed. **We incorporate all of these best practices into designing and executing a plan to gain confidence in your capability's execution and continued growth.**

Program Development usually involves a combination of growing your team member's capabilities, ensuring you have efficient processes, and making sure you have the technology to support your goals. Where gaps exist, we can help design, educate, and build a holistic capability to exceed your expectations. SpecterOps also has a vast partner network that we can leverage to ensure you are getting the best of breed solutions to your hardest challenges.

Detection and Response Program Development

Increase your operational capabilities to meet strategic objectives, including staff skill sets, technical capabilities, and program support infrastructure. Develop and execute strategic, operational, and tactical plans with a roadmap for bringing current capabilities to desired outcomes. If you do not have the expertise in-house to execute on your roadmap, our team of expert level resources will move your program forward.

Offensive (Red Team) Program Development

Mature your internal offensive security program capabilities to meet organizational objectives. Support capability enhancement through targeted skill set development, capability/technology development, research, documentation, and communications strategies.

Operational Experience

Leverage access to our organizational maturity and experience as the premier offensive security provider to improve your technical gaps and targeted growth areas. You'll receive a structured approach and expert guidance to enhance your offensive and defensive security programs.
